

# 3D Decoupage Instructions

1. Using the Charisma artwork, print out your chosen Charisma onto paper or cardstock.

2. Trim your chosen flower Charisma from the sheet. Place the die onto the image, line it up, secure with low tack tape and run through a die cutting machine.

3. Stick your die cut onto your project. Repeat step 2 to die cut the remaining Charismas.

4. Make decoupage by adding the remaining flowerheads and leaves directly onto the original image using foam pads. This will make those elements stand out with more dimension.

**Designs for illustration purposes only.**
