

# 3D Miniatures

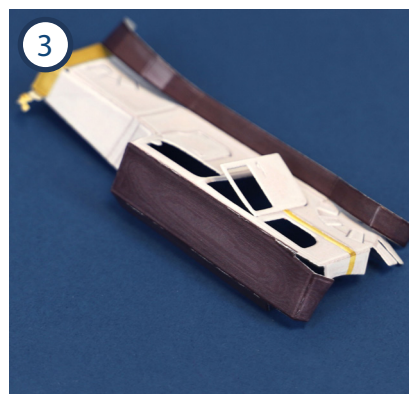

## Car

1  
Cut one A, B, C, F, and H die. Cut three D and E dies and two G dies. If desired, cut the optional Bow, Wheel Nut Decoupage, and Front Light Decoupage.

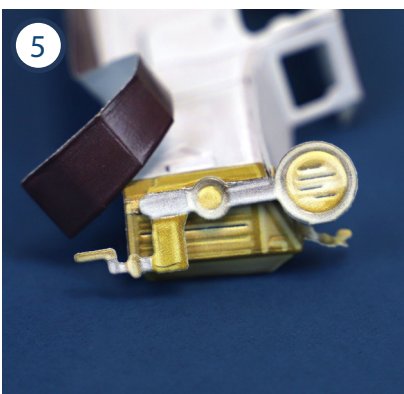

2  
Create the Car body by folding round the front to square it off. Fold down the windscreen and mat the bonnet onto the tabs between the windscreen and front. Fold down and secure the roof. Fold up the running board and shape around the wheel locations as shown.

3  
View the Car from the top to ensure the bonnet and roof are flush with the side.

4  
Mat the back onto the car by securing it onto the tabs.

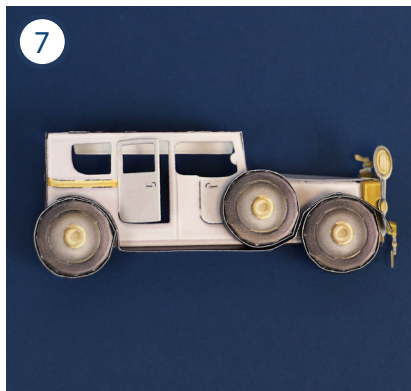

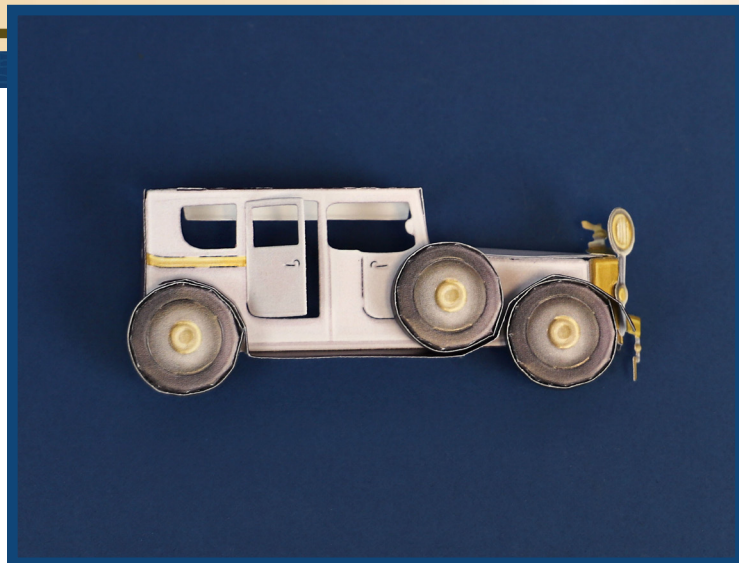

5  
Mat the light onto the car front. Add the decoupage if desired.

6  
Fold back the tabs of each wheel (die D). Along these tabs, mat the tyres (die E) around to cover the tabs. Leave the long tab on the reverse loose as shown.

# 3D Miniatures

## Car

Mat the wheels and any remaining embellishments onto the card.
