

Diamond Fold Card

What you need to do:

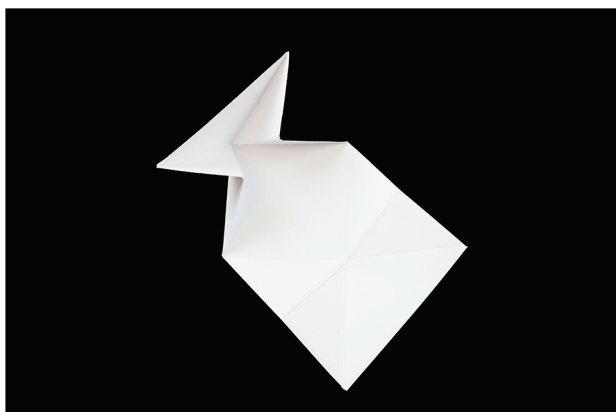

1 Cut the Diamond Fold Card from your chosen cardstock, using the correct plates for your die cutting machine. The sides of the card are designed to stay in the card ready to be cut to your chosen size.

2 Using a guillotine cut the sides of the card to your chosen length.

3 Fold the two vertical lines to create mountain folds, open before folding the diagonal lines into valley folds. Gently fold your card along these lines to create your diamond shape.

4 Decorate and embellish as required.
