

# Double Shutter Card

1. Using the Double Shutter card die set, cut the Base twice from your chosen cardstock.

2. Mat the two plain sides of the bases together to create the card back. Starting from the left score lines, the first three are mountain folds, the second two are valley folds, the following two are mountain folds and finally valley fold the inside back of the card. Turn the card around and repeat for the other side.

3. Using the Plaque 5 die from the Double Shutter Card die set, cut into the shutters as shown.

4. Using the plaques from the Double Shutter Card die set, decorate the shutter card in your chosen colours. For example, mat Plaque 11 onto the Frame and mat onto the back of the card.

Here's a little more inspiration to show different ways of decorating the Double Shutter Card.
