

# Easel Slider Instructions

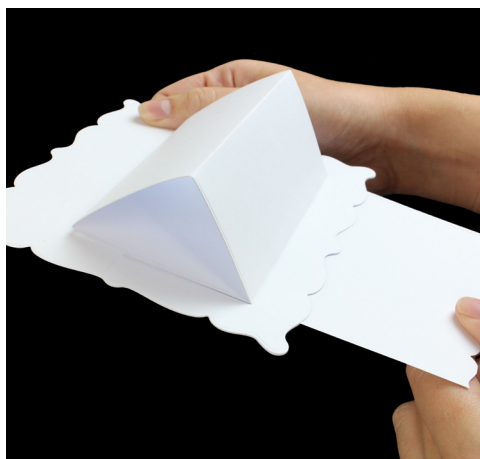

Cut easel slider base, easel slider mat 1 and easel slider mat 2 from your chosen card stock.

Fold the easel slider base on the crease lines, the fold nearest the fancy edge should be folded upwards and the second and third folds should be folded back so that the slider mechanism is now under the fancy edge.

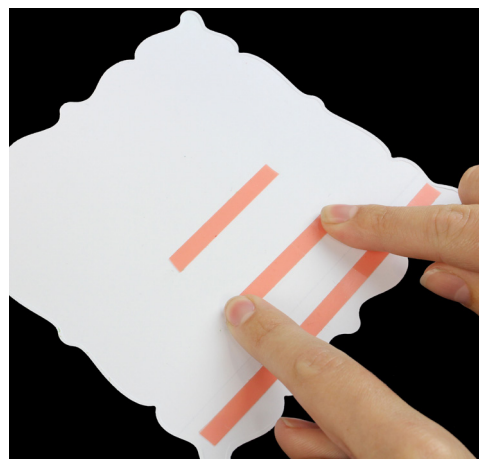

Turn over the easel slider base and put a line of tape along the two short tabs as shown.

Peel off the tape backing to reveal the adhesive. Line up the fancy edges of the easel slider base to the fancy edges of mat 1. The slider will now slide through the gap between the attached sides.

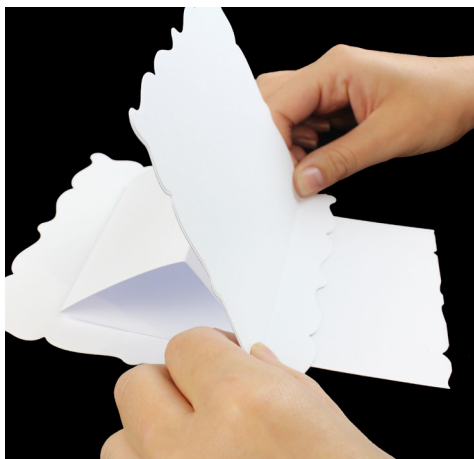

Put a line of tape on the back of easel slider mat 2 under the score line.

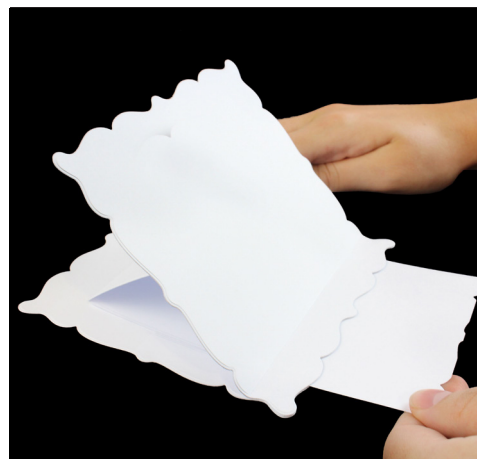

Add a little more tape centrally above the score line being careful not to put it more than half way up.

Turn over mat 2 so the front is facing you and fold upwards along the score line.

Remove the tape backing. Line up the fancy edges of mat 1 with the front of the of the easel slider base.

Your finished easel slider card should look like this.
