Fantasy Christmas

You Will Need:

- Fantasy Christmas Download
- White Cardstock
- Glitter
- Foam Pads
- Detail Glue
- Double Sided Tape

What you need to do:

1 Using white A4 cardstock fold in half to create an A5 base card.

2 Cut out a topper and some elements from one of the design sheets.

3 Cut a 21cm x 14.8cm backing paper and attach to the front of the card using double sided tape.

Tear strips of backing paper towards you to create a white torn edge. Glue and curl the paper to the front of the card. Add your chosen border.

5 Use foam pads attach the topper and elements to the front of the card.

6 Finish off with some glitter for that extra bit of sparkle.

Top Tip

Back the topper with card to give it more substance.
