

Lace Inset Stepper Card

1. Place the lace inset stepper card onto the base plate, if preferred use low tack tape to secure. Run through the machine a few times and if required shim with a strip of cardstock across the centre cuts.

2. To fold the card into place, start from the bottom edge with the nearest score lines to the edge. Mountain fold on those two small score lines, either side of the centre. Valley fold the next two score lines. Mountain fold the centre score line and the remaining score lines either side.

3. Cut two Mat 2-3 from blue cardstock and mat onto the columns either side of the centre. Cut Lace Panel 1 from blue cardstock and mat onto the front of the card.

Step 4. Cut two Mat 3 from white cardstock and mat onto the card.

Step 5. Cut two Mat 2-1 from blue cardstock and mat onto the card.

Step 6. Cut Embellishment 3 from blue cardstock. Cut a sentiment from white cardstock and mat onto the embellishment. Mat onto the front of the card. Finish with pearls.

Top Tip:

The edges of the card and the centre fold are very intricate, using a folder of Cut Tidy on both sides will help.
