

Lemon Verbena

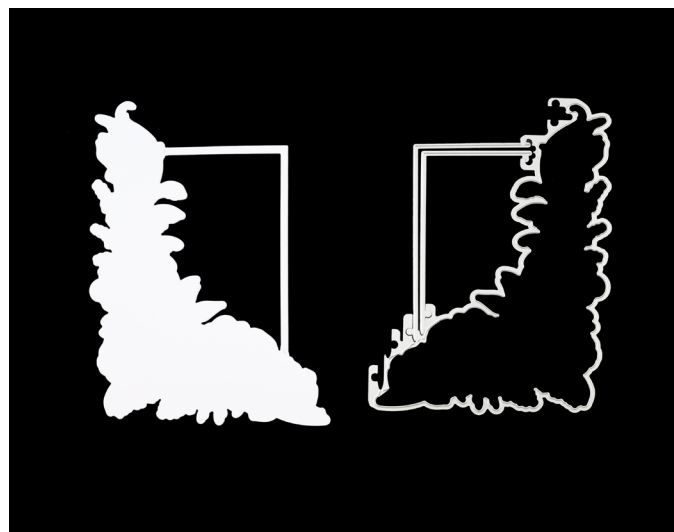

(Images used for demonstrative purposes only)

The Lemon Verbena Collection uses the Link system to connect dies together like a jigsaw, allowing you to adjust the size, position, and thickness of your frames to tailor your projects as you see fit. See the examples below using the Lemon Verbena Rectangle die set (464698).

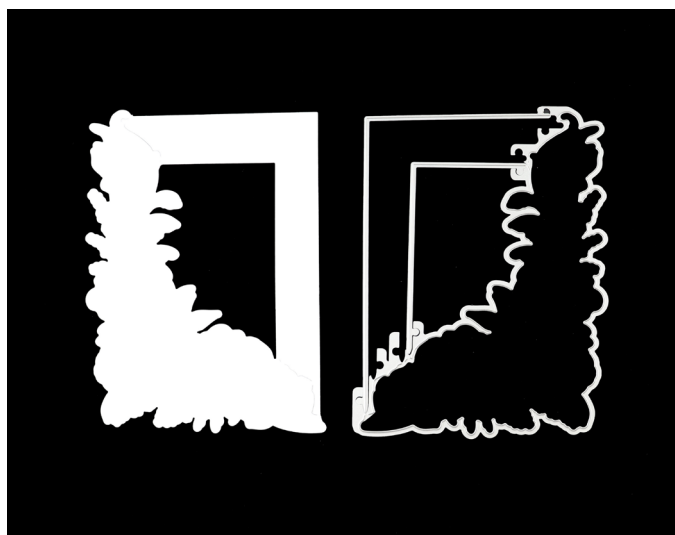

Use both the Large and Small Inner and Outer Rectangles to cut the Flower Corner with an adjoining hollow border.

Cutting just one pair of the Inner or Outer Rectangles creates a single thin border onto your Corner.

See overleaf for more examples

Using the Small Inner Rectangle with the Large Outer Rectangle creates the thickest solid border attached to the Flower Corner.

Mix and match the Rectangles with the Flower Corner using the Link system to create different styles and thicknesses of your borders.

Download your free Charisma to build up gorgeous floral decoupage on your Flower Corners and enhance your Lemon Verbena frames even further.
