

You will need:

- Sewing machine
- Crossover or die cutting machine
- Linen & Lace™ Set of 3 60° Triangles QF160
- Moda Fresh Air Two Tone Floral Yellow for main front fabric and binding
- Squares of fabric from the Moda Fresh Air Collection in Spikey Flower Blue, Polka Dot Daisy Blue and Makower Ahoy Anchors fabric
- 9" x 9" backing fabric
- 9" x 9" batting
- Thread

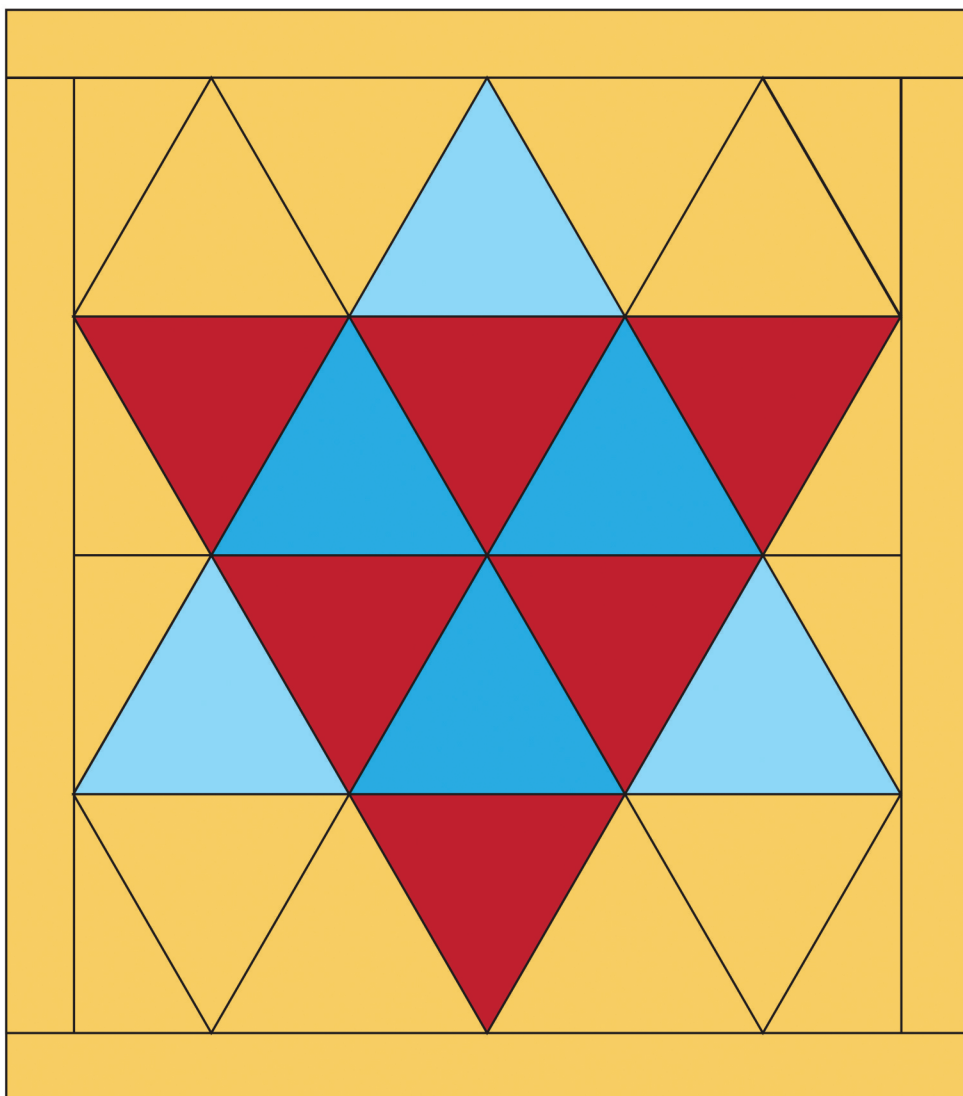

SKILL LEVEL: *Intermediate*

STEP BY STEPS...

1. Using the Crossover™ machine or your choice of die cutting machine, place the medium triangle from the 60° triangle set onto the base plate and cover with the following quantity of fabric pieces – three from blue 1, three from blue 2, six from the red fabric and 16 from the yellow background fabric.

2. Lay the triangles out so they match the pattern provided. This will help you keep track when you begin sewing them together (**See Pic A**).

3. When the triangles are cut, the dies will make a little notch at the point of each triangle which marks a perfect ¼ inch seam allowance (**See Pic B**).

Step By Step

4. Place the corresponding triangles with right sides together and sew with a $\frac{1}{4}$ inch seam allowance from notch to notch (**See Pic C**).

5. Sew the triangles together in diagonal strips (**See Pic D**).

6. For each strip, press the seams in opposite directions. This will make it much easier to align the rows when you come to sew them together (**See Pic E**).

7. Place each row right sides together and pin the intersections of the triangles together. Place the pin though the top of the stitching at the apex of the triangle. They should line up easily if you have stitched through the notches. Stitch the rows together (**See Pic F**).

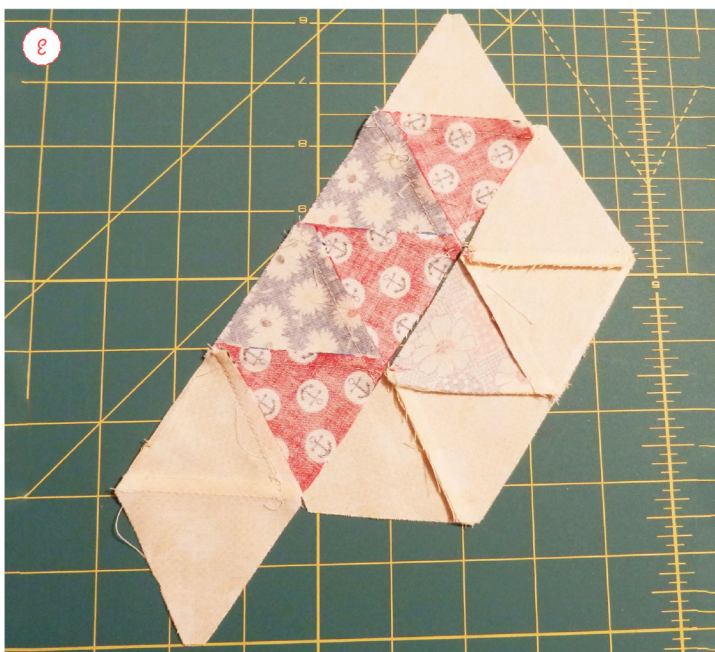

8. Press the seams open as you sew the strips together (**See Pic G**).

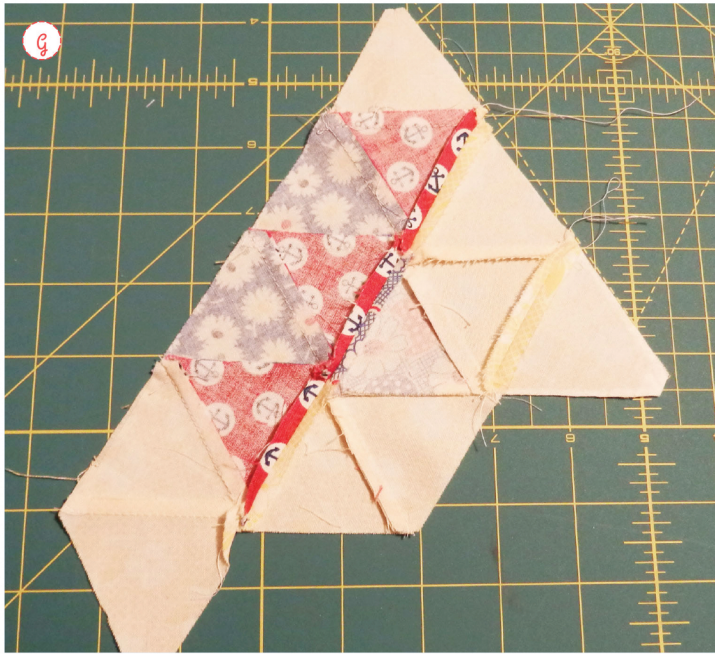

9. Continue sewing the strips together until your star panel is completed (**See Pic H**).

10. Trim the block to $\frac{1}{4}$ inch from the point of the triangles (**See Pic I**).

11. Cut four strips of the yellow fabric measuring one inch wide. Sew to the sides of the trimmed square. Press, trim and sew the other two strips to the top and the bottom of the block. Trim the backing and batting to the same size as the finished block. Layer up with the batting first, then backing and finally the top piece (**See Pic J**).

12. Sew with a $\frac{1}{4}$ inch seam allowance all the way around the block – leaving a gap of approximately four inches side along one side. Turn the block through the unstitched gap and press the block. Sew the hole closed and admire your handiwork!

“This is a wonderfully simple but effective pattern, which makes great use of scraps of fabric, and will give you the perfect spot to rest your cup of tea, piece of cake and so much more!”

Mini Quilted Panel
