

# Story Book

1  
Cut two of the largest mats for the book covers, and some smaller mats for the pages. Cut the decorative elements as desired.

2  
Score down the left-hand side of the front cover and valley fold. Stick the decorative elements onto the cover.

3  
Use the mats to cut apertures into your pages. Decorate and layer them. Once happy with the layout, stick the covers together with the pages sandwiched in between.

4  
Add any remaining decorations to the book. To make a working clasp, use hook and loop to secure the book when closed.
