

Masks

Use Tattered Lace® masks to create beautiful textures, add tonal colour and build up detailed designs which compliment your die collection perfectly.

Tattered Lace® masks have been created so that you can cut out the individual elements from the sheet to create either a mask or stencil to use on your artwork, providing you with maximum flexibility from the product.

Use the masks to add detailed elements to your cards, toppers, and scrap book projects. Each mask has been designed so that it will allow you to get multiple uses from your designs.

For example, add a hillside profile using one edge of your mask, then add the detailed grass over the top to create depth using the other edge.

Use Tattered Lace® with distress inks and markers to create beautiful tones and vintage effects.

All masks are fully wipe-able and clean easily allowing you to re-use your collection over and over again.

Instructions for Use

- 1 Create the front of your card, topper, scrap book page or other element of your design you wish to use the masks with.
- 2 With your chosen design selected remove it from the sheet by snipping away the pips at the edges of the mask.
- 3 Use the aperture created by removing the mask from the sheet to lay down colour using inks, markers and sprays.
- 4 Once dry, place the cut out over the inked area you created in step 3 and secure in place with low tack tape.
- 5 Ink around the mask freely adding other details to your design. Once the ink around your mask has dried remove the mask and the low tack tape to reveal the design below.
