

Through The Trees

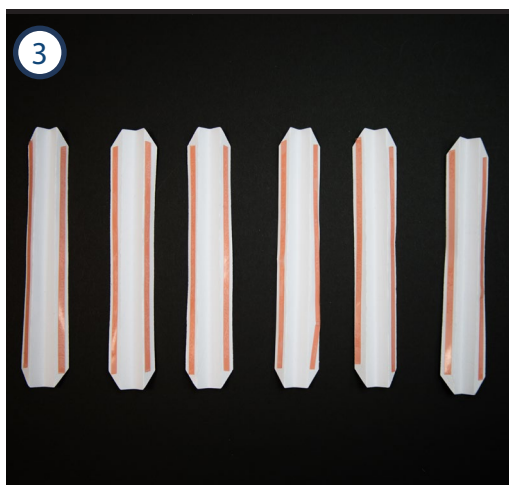

How to make a concertina box

To make the concertina box first cut largest rectangle mat to create the back and largest rectangle mat with the smallest rectangle mat to create the front frame.

To create the sides cut the concertina side with tabs twice for each layer of separation. Valley fold down the centre score line and mountain fold down the outer score lines.

Add double sided tape to the bottom of the tabs.

Using the taped tab mat the concertina side along the left edge of the back piece.

Through The Trees

How to make a concertina box

5
First cut the largest rectangle mat with your chosen aperture scene to create an inner frame. Mat the left edge of the aperture back to the other taped tab of the of the concertina side.

6
Repeat step 4 and 5 matting on top of the left edge to extend the depth of the concertina box finishing with the front frame.

7
Mat the remaining concertina sides in between the back, inner frames and front frame along the right edge to secure your concertina box together.
