

Twist & Pop Card

1. Fold a pre-scored card blank along the score line to make a square card.

2. Cut out the pre-printed background pieces from the sheet.

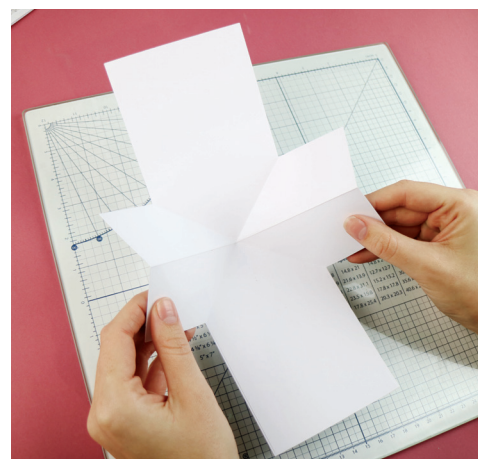

3. Mat the square background piece flat in the centre of the front of the card.

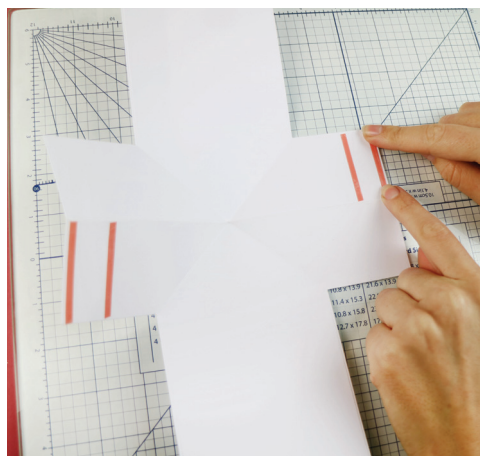

4. Mat the white pre-cut square with foam tape in the centre on top of the background piece, leaving an even border all the way round.

5. Push out and mat the co-ordinating topper in the centre of the card with foam tape. Embellish with white pearl gems.

6. Take the pre-cut Twist and Pop card shape, valley and mountain fold along the score lines to create part of the mechanism.

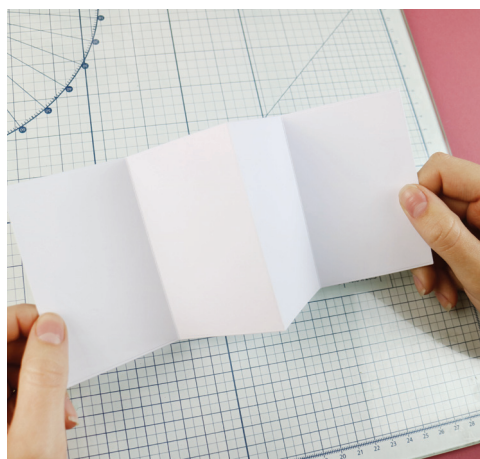

7. Open up the folded Twist and Pop card shape and attach tape to the bottom panel on the left and the top panel on the right.

8. Mat the shaped background pieces flat onto the Twist and Pop card shape.

9. Attach the Twist and Pop card shape inside the square card, making sure that adhesive is only applied to the back of the two opposite larger panels, positioning it in the centre and the point in the fold.

10. Take the pre-cut Twist and Pop accordion piece, valley and mountain fold along the score lines to create a concertina effect.

11. Mat the rectangular background pieces flat onto the Twist and Pop accordion piece. Mat the decorative panels and sentiment toppers onto the concertina panel.

12. Remove the backing off the tape applied to the Twist and Pop card shape in step 7 and attach the accordion piece. Line up the centre score line with the centre of the card shape, ensuring the sides line up, then gently lift the centre fold of the accordion to ensure the card closes easily. Embellish with white pearl gems.
