

HOW TO USE THE... ESSENTIALS SNOWGLOBE

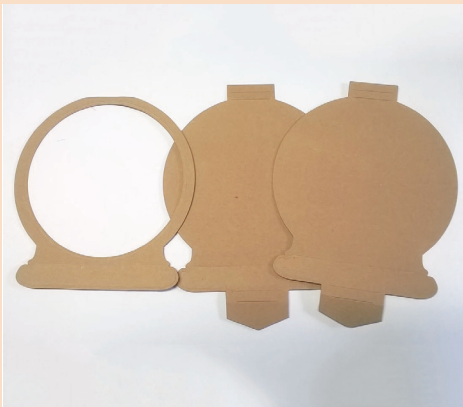

1. Cut the complete snowglobe for the back of the card. Cut a second one but use the circle die to cut an aperture and create the front of the card.

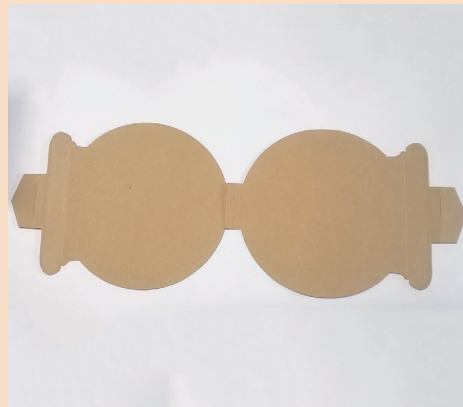

2. Secure the two top tabs together with super sticky tape to create the card. Slot the pointed tab into the slot at the base to allow the card to stand.

If you are using lighter weight cardstock you may want to add a little more stability by following the instructions below:

1. Cut two complete snowglobes and one front. Cut the tabs from the front aperture section.

2. Secure the top tabs together on the two complete snowglobes.

3. Use 3D foam tape to attach the aperture section to the front of the card. Slot the pointed tab in to the slot at the base to allow the card to stand.

Decorate as required.
